

SAE-560-A

Addressable sounder

Description

SAE-560-A acoustic addressable sounder from Easy-Detect, with very low consumption. It has a maximum power of 110 dB.

It has 32 tones and 3 volume levels, high, medium and low, which are selected through the central configuration. It is compatible with all Easy-Detect addressable fire alarm control panels.

Addressing of this range can be done:

- Using PGE-100 manual programming tool.
- Using the serial number of the devices.
- By app via Bluetooth.
- Through self-programming

Applications

The easy-detect SAE-560-A sounder is designed to warn people to evacuate in the event of a fire.

Features

Built-in docking station.

Technical Features

SOUNDER	Loop Features:	Occupies 1 address in the loop.
	Working voltage:	38 VDC
	Consumption in rest:	< 120 μ A
	Consumption in alarm:	< 6 mA

CONNECTION	2 x 1,5 m2 braided and shielded connection
-------------------	--------------------------------------------

ENVIRONMENT	Working temperature:	From -10°C to 70°C
	humidity:	95% without condensation
	IP Index:	IP30

PHYSICAL FEATURES	Material:	ABS
--------------------------	-----------	-----

CERTIFICATION	EN 54-3
----------------------	---------

Dimensions

104 mm x 84 mm
